

Septihol™ Alcohol Solution is a ready to use blend of 70% (v/v) USP Isopropyl alcohol and 30% USP Purified Water designed to remove organic and inorganic residue from hard, non-porous surfaces. Septihol Alcohol Solution does not contain stabilizers or denaturants, so it evaporates quickly and completely. It is ideal for the removal of process residues and for routine glove decontamination. This product has an extensive documentation package to meet your validation objectives and is supported by the STERIS Technical Services team for individualized application and validation assistance.

Septihol™ Alcohol Solution

Ideal for removal of process residues and routine glove decontamination

Features

Formulation is ready to use without any mixing

Ergonomically designed bottle with attached trigger spray

Evaporates quickly

Formulated with no additives, stabilizers or denaturants

Superior material compatibility

Filtered to 0.22 micron

Sterile version is gamma irradiated and each lot USP sterility tested

Manufactured in accordance with cGMP with complete lot traceability

Benefits

Easy to use and saves the time and labor of disinfectant preparation

Eliminates errors in dilution preparation and the need to validate preparation procedures

Eliminates need to assemble the product

Ability to maintain visibly clean facilities without rinsing after every application

Evaporates completely, leaving no residues

Allows for high frequency use on most surfaces

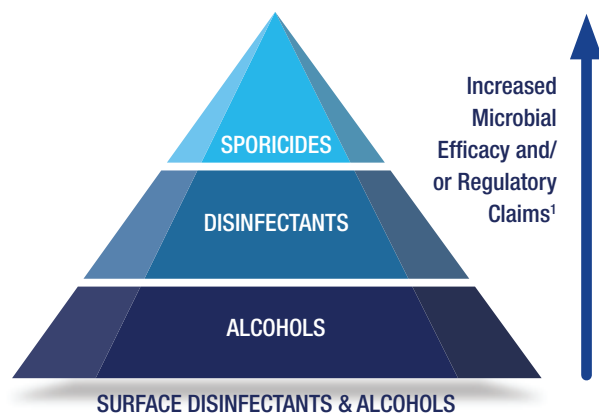

Reduces particulate levels

Facilitates introduction into your critical areas

Supports quality assurance and quality control

Applications

- Residue removal from:
 - » Equipment
 - » BSL hoods
 - » Countertops
 - » Gloves
 - » Laminar flow curtains
 - » Windows
- Products may be applied by:
 - » Wiping
 - » Spraying

¹Products that fall into the categories at the bottom of the pyramid are most frequently used and are generally not sporicidal. Progression up the pyramid indicates stronger performance overall and a broader spectrum of claims.

An important aspect to any cleaning program is including rinsing on some frequency to control residues. Nearly all chemistries used to maintain a clean environment will leave some type of residue behind from surfactants or stabilizers. Residues may lead to failures in visual cleanliness, or cause concerns with the surface functionality. When removing residues, it is important to use products that do not simply leave behind a different residue. Septihol Ready to Use Alcohol Solutions are ideal for this important application. Our Technical Service group can help customize your contamination control program to take advantage of this excellent product.

Septihol™ Alcohol Solution

Low residue ethanol based cleaner
